Delivering Qualifications in the Workplace

FENESTRATION INSTALLATION & SURVEYING SCQF LEVEL 6

This qualification is aimed at those who work as Installers and Surveyors of windows and doors, or conservatories or curtain walling, and is available with 2 pathways to achievement, Installer and Surveyor.

It is not expected that all Installers carry out the same activities, or that Installers and Surveyors carry out the same duties: the optional units are structured to ensure that all those employed in the industry have equal opportunity to achieve the relevant qualification, each pathway has its own group of units in a separate option group, although they both share common units in the mandatory section of the qualification.

This qualification is at Level 3, and should be taken by those who are experienced Installers or Surveyors, capable of dealing with a wide range of problems, including working with installations that have complex requirements. Candidates will often take a technical supervisory role, particularly in relation to less-experienced Installers or Surveyors. They will also work closely with customers and have well-developed customer service skills

Find out more about the qualification overleaf.

FENESTRATION INSTALLATION & SURVEYING SCQF LEVEL 6 - UNITS

To achieve the award you must:

- Complete all Mandatory units as shown, plus the required number of units from the selected pathway.
- Complete Core Skills in Numeracy, ICT and Problem Solving at SCQF Level 5 (if you have not already achieved them).
